High Speed High Quality Solvent Printer

Amplify Flexibility

Product Features

- Solvent printing is generally a higher resolution print method as apposed to UV printing.
- Most modern-day solvent printers print at around 800-1500dpi and have 100's of print nozzles per head.
- Print nozzles fire ink onto the print media.
- The surface of the Piezo print head contains tiny, microscopic apertures.
- Double Guide Rail for Stability and High Speed.
- Future Readiness for UV Roll to Roll Printer
